## What is a Hill Day?

Global health advocates use **Hill Days** to garner support from U.S. policymakers for a specific global health issue. Activities include meeting with U.S. leadership (both Senators and Representatives) on Capitol Hill and sharing key messages, including relevant facts and success stories, with them. Some Hill Days are planned around significant health days (marked in blue). Hill Days are led by GHC members, partners, and advocacy groups.

**Please utilize your social media channels to further elevate these important global health issues!**

**March 6:** Maternal and Child Health (MNCH) Roundtable Hill Day  
RESULTS Hill Day
