

# Pandemics, Politics and Privilege: The Good, Bad, & Ugly U.S. Legacy in Global Health

## GHC SUMMIT 2020 EVENT SPONSORSHIP

**NOVEMBER 19-20, 2020 VIRTUAL**

**Become a sponsor and ensure your participation today!**

Global Health Council (GHC) is proud to announce our virtual 2020 Global Health Council Summit. This virtual event will take place over two days with a focus on Pandemics, Politics, and Privilege: The Good, Bad, & Ugly U.S. Legacy in Global Health. We know that we don't have all the answers as an organization or subset of actors but we want to be part of driving the solution to longstanding challenges and push us all to do better by those we serve. This means taking a hard look with and hearing more from those directly affected by U.S. policies and programs to discuss where those efforts have succeeded and failed, and how we approach investments or initiatives with a stronger focus on **equity, justice, and humility**.

We want to walk away from this time together with a deeper commitment to shifting the power dynamics and structural barriers not only to respective goals but also our ideal method of reaching those such as shared plans and resources or local leadership and decision-making. The current system isn't built to make these dreams we have a reality.

**Contact Heyab Ogbasion at [hogbasion@globalhealth.org](mailto:hogbasion@globalhealth.org) by October 16 to confirm your sponsorship.**
