The Summit of the Future will bring together world leaders to forge international consensus on how we deliver a better present and safeguard the future. It presents a decisive opportunity to build a future that will ensure all people can live healthy, peaceful, prosperous and fulfilling lives in a sustainable world. The primary outcome document will be the Pact for the Future, annexed to which will be a Declaration on Future Generations and a Global Digital Compact.

As Member States work to negotiate the outcome documents, universal health coverage (UHC) and health must be prioritized and placed at the forefront of collective actions. This toolkit supports stakeholders with UHC2030’s key messaging and proposed language for engaging with Member States and preparations for the Summit of the Future.

Background on the Summit of the Future .......................................... 16
UHC2030’s key messages

• Universal health coverage (UHC) must be at the front and centre of the Summit of the Future’s agenda.
  o In adopting the 2023 Political Declaration at the UN High-level Meeting on UHC, Member States reaffirmed their commitment to accelerate progress towards achieving Health for All.
  o The Summit of the Future should highlight UHC commitments and ensure UHC is at the forefront of collective global actions.
• UHC means that all people have access to the full range of quality health services they need, when and where they need them, without financial hardship.
• UHC is central to achieving health for all, health equity, well-being, and the 2030 Agenda.
  o It is essential for gender equality, societal inclusion, ending poverty, improving education, economic growth and development, and contributing to stable and peaceful societies worldwide.
• By prioritizing the right to the highest attainable standard of physical and mental health and well-being for all, and accelerating actions towards the achievement of UHC, Member States will move progress towards the 2030 Agenda as a whole and lay the foundation for fairer and safer world.
• Accelerating actions towards achieving UHC is critical for our collective response to global threats - including climate change, conflicts, humanitarian crises, health emergencies and pandemics.
  o We must build equitable and resilient health systems to equip future generations to respond to these emergencies.
• Acting on commitments for UHC means strengthening coverage of health services and financial protection, while addressing other barriers that hinder vulnerable and marginalised populations from accessing the full range of quality health services they need.
• We must prioritize UHC based on primary health care, which can deliver 90% of essential UHC interventions; build gender-responsive health systems; and leverage new opportunities in digital health to include everyone, everywhere - especially the most vulnerable and marginalised.
• The international community must act together with unity, international solidarity, cooperation and renewed multilateralism to create an enabling environment for UHC at all levels.
• In a world where 4.5 billion people - over half of the world’s population - lack access to essential health services, and 2 billion people face financial hardship in accessing such services, we cannot account for the interests of future generations without prioritizing the right to health.
Inputs by UHC2030 on zero draft of the Pact for the Future

Overview of Inputs

Chapeau

- Call on the Declaration to recognize health, including disease outbreaks, pandemics, and health emergencies, as having critical impacts for the international system and future generations. [para 4]
- Retain references to the need for strong multilateral systems built on the principles of trust, equity, solidarity, and universality. [para 5]
- Highlight that global emergencies need multilateral solutions, and our international system must be ready to address emerging and new global health challenges. [para 6]
- Acknowledge the impact of health and UHC on every aspect of people’s lives, including impacts for gender equality, societal inclusion, ending poverty, improving education, economic growth and development, and contributing to stable and peaceful societies.
- Reflect the interlinked nature of the SDGs and the critical role of UHC, not only to achieving health and well-being targets, but meeting SDG agenda as a whole, including eradicating poverty in all its forms and dimensions, including extreme poverty. [para 7]
- Retain references to Universal Declaration of Human Rights and the human rights and fundamental freedoms enshrined therein. Include specific mentions of the right to the highest attainable standard of physical and mental health. [para 8]
- Recognize that health is a precondition for and an outcome and indicator of all three dimensions of sustainable development. [para 8]
- Ground the declaration in the principles of equity, non-discrimination, social justice, and human rights, aligning with the 2030 Agenda pledge to leave no one behind, the right to the highest attainable standard of physical and mental health and well-being for all, and member state commitments on UHC by:
  - Retaining references to gender equality and include language that reflects gender responsive health systems and empowerment of women and girls throughout text
  - Retaining references to vulnerable populations throughout text
  - Retaining references to eliminating Violence Against Women and Girls throughout text
- Acknowledge environmental crises impact health and well-being of populations, health systems, and access to health care services- increasing risks of health emergencies. [para 12]
- Acknowledge the role digital technologies can play in addressing equality and equity gaps, including for UHC and digital health. [para 14]

Chapter 1: Sustainable development and financing for development

- Highlight universal health coverage as a pillar to achieving the SDGs as a whole and connection of universal health coverage to poverty eradication, climate, peace and security agenda.
- Elevate universal health coverage as a core pillar of SDG goal and its need to be at the front and centre of the multilateral agenda.
Retain references to the high-level meeting on universal health coverage and health related texts, key to ensuring the declaration reaffirms critical priorities of strengthening health systems through primary health care as well as UHC and health security as two intertwined goals.

o Acknowledge the adverse impacts of climate change on health and the need to strengthen adaptation of the health sector by building climate-resilient health systems.

Chapter 2: International Peace and Security

- Recognize the detrimental impacts of armed conflicts on the health and well-being of populations and sustainable health systems. Recognize that conflicts and humanitarian crises pose existential risks to UHC.

Chapter 3: Science, technology and innovation and digital cooperation

- Recognize the potential of technology and innovation to improve women's and girls' health and wellbeing.
- Elevate digital health opportunities in ensuring access to quality health services for underserved communities, including those living in rural and remote areas.

<tbody>
<tr>
<td>4</td>
<td>We recognize that challenges such as these can only be addressed through strong and sustained international cooperation. To enhance our cooperation, we need a multilateral system that is fit for the future, ready to address political, economic, health, environmental and technological changes in the world, and with the agility to adapt to an uncertain future. We know that multilateral institutions – especially the Security Council and the international financial architecture – have struggled to address the scale of the challenges they face and live up to the world’s expectations of them. Too often, international commitments that are made, remain unfulfilled.</td>
<td>Add reference to health. <strong>Reasoning:</strong> Inclusion acknowledges health, including disease outbreaks, pandemics and health emergencies, as having a critical impact on the international system. The COVID-19 pandemic demonstrated that the multilateral system must be ready to address emerging and new global health challenges. The pandemic has halted, or reversed, years, or even decades of development progress. The zero draft does not reflect this impact, only referencing the pandemic in one place at p137. In order to learn the lessons from Covid-19 we must elevate health to the front and center of the global political agenda if we wish to build back better and achieve SDG targets.</td>
</tr>
<tr>
<td>5</td>
<td>We believe there is a path to a better future for all of humanity. We are committed to meaningful changes to global governance to address new and emerging challenges. We commit to ensure the whole world – especially the most vulnerable – are ready for the vastly more complex challenges to come. We also commit to deliver on our existing commitments. We will re-earn the trust of our people and each other, which is the vital precondition for effective international cooperation.</td>
<td>Ensure references to vulnerable populations are retained throughout the text. Also in para: 106 <strong>Reasoning:</strong> Grounds the declaration in the principles of equity, non-discrimination, social justice, and human rights. Aligns with the 2030 Agenda pledge to leave no one behind. Aligns with the right to the highest attainable standard of physical and mental health and well-being for all, without discrimination. Aligns with MS commitments on UHC, ensuring all people have access to the full range of quality health services they need, when and where they need them, without financial hardship.</td>
</tr>
<tr>
<td>6</td>
<td>Today, we pledge a new beginning in international cooperation with a new approach. We will cooperate to manage risks and harness opportunities for the benefit of all, guided by the principles of trust,</td>
<td>Add reference to “Healthier”. Retain references to international cooperation and multilateralism based on the principles of trust, equity, solidarity, and universality. We will</td>
</tr>
</tbody>
</table>
equity, solidarity, and universality. We will collectively strive for a world that is healthier, safer, more peaceful, more just, more equal, more inclusive, more sustainable, and more prosperous.

| Reasoning: |
| As demonstrated by COVID-19 pandemic, health impacts can significantly shape our world and international cooperation on health is critical to securing peaceful, inclusive, and prosperous societies and regions. |

| 7 |
| To achieve this, we reaffirm our commitment to the Charter of the United Nations and international law. We also reaffirm that the three pillars of the United Nations – development, peace and security, and human rights – are interlinked and mutually reinforcing. We further reaffirm that eradicating poverty in all its forms and dimensions, including extreme poverty, is the greatest global challenge and an indispensable requirement for sustainable development. **We recognize that universal health coverage is fundamental for achieving the Sustainable Development Goals related not only to health and well-being, but also to eradicating poverty in all its forms and dimensions, including extreme poverty.** |

| Reasoning: |
| Language should reflect the interlinked nature of the SDGs and the critical role of UHC, not only to achieving health and well-being targets, but meeting SDG agenda as a whole. |

| |
| UHC fundamentally address poverty eradication by ending hunger, achieving food security and improved nutrition, ensuring inclusive and equitable quality education and promoting lifelong learning opportunities, achieving gender equality and empowering all women and girls, promoting sustained, inclusive and sustainable economic growth and decent work for all, reducing inequalities within and among countries, ensuring just, peaceful and inclusive societies and to building and fostering partnerships, while reaching the goals and targets included throughout the 2030 Agenda for Sustainable Development is critical for the attainment of healthy lives and well-being for all, with a focus on health outcomes throughout the life course; |

<p>| |
| |
| UHC with health systems anchored in primary health care also provides the basis |</p>

<th>8</th>
<th>Every commitment in this Pact is guided by principles of human rights and gender equality and will contribute to their fulfilment. On the occasion of its seventy-fifth anniversary, we reaffirm the Universal Declaration of Human Rights and the human rights and fundamental freedoms enshrined therein. This anniversary offers a valuable opportunity to reflect on achievements, best practices and challenges with regard to the full realization of all human rights for all. We recognize the universality, indivisibility, interdependence and interrelatedness of all human rights and reaffirm our commitment to ensuring all human rights, including the right to development and the right of every human being, without distinction of any kind, to the enjoyment of the highest attainable standard of physical and mental health and recognize that health is a precondition for and an outcome and indicator of all three dimensions of sustainable development, and fundamental freedoms of everyone. We recognize that human rights are at the heart of peaceful, just, and inclusive societies and need to be promoted and protected for the sake of current and future generations. We commit to stepping up our efforts to fight against racism, all forms of discrimination, xenophobia and related intolerance.</th>

</table>
forms of violence against women and girls and remove all legal, social and economic barriers to achieve gender equality. We reaffirm that achieving gender equality, empowering all women and girls, and the full realization of their human rights are essential to achieving sustained, inclusive and equitable economic growth and sustainable development.

**Reasoning:**
Achieving universal education (SDG 4) and universal health coverage (SDG 3) are interconnected goals that contribute to improving the overall quality of life and well-being of individuals and communities, and the empowerment of women and girls (SDG 5).

Health and wellbeing is critical to the rights of women and girls. Education is a key determinant of health outcomes. When women and girls are educated, they are more likely to make informed health-related decisions for themselves and their families. Access to education increases women and girls' awareness of their sexual and reproductive health and reproductive rights, in turn increasing access to sexual and reproductive health-care services, including for family planning.

|   | We reaffirm the Beijing Declaration and Platform for Action, in which it is recognized that it is essential that all women not only benefit from technology, but also participate in the process from the design to the application, monitoring and evaluation stages. We pledge to harness the potential of technology and innovation to improve women’s and girls’ lives, **including health and wellbeing**, and to close the development divide and the digital divide, including the gender digital divide, as well as address the risks and challenges emerging from the use of technologies. We commit to addressing persistent barriers to equal access for women and girls to science, technology and innovation. | Add reference to the potential of digital technologies to improve women’s and girl’s “health and wellbeing.”

**Reasoning:** New technology and innovation can bridge access barriers, helping address health needs of women and girls. |
|---|---|---|
| 96 | We recognize the need to mobilize and scale up the means of implementation, including financing, for science, technology and innovation, especially in developing countries, in support of the Sustainable Development Goals. **We commit to investing in and increasing access and availability to digital health technologies, information, and innovations to ensure quality healthcare and treatment services, including to those living in underserved, rural and remote areas, or in areas difficult to access by applying an equity lens to reach the furthest behind first and accelerate progress towards health and well-being for all.** | Add references to investments and improved access to digital health technologies, especially for people in underserved areas.

**Reasoning:** Digital health technologies offer significant opportunities in serving the health needs of people in rural and remote areas, therefore access to these tools as well as investment must be increased. |
|   | We support calls for **the sharing of** technologies and skills, and | Add reference to “health and wellbeing” and co-operation to achieve accelerated |
| 105 | We underline the importance of establishing in the national context robust social security systems as well as social protection floors that respond to the needs and rights of young persons and children, including all girls and young women. We also recognize that the well-being of young people is closely intertwined with the enjoyment of their right to the highest attainable standard of physical and mental health, including sexual and reproductive health. | Protect paragraph references |
|     | **Reasoning:** Sexual and reproductive health is a fundamental human right. UHC aims to provide access to essential healthcare services without financial hardship, and SRH services, including family planning, maternal health, and prevention and treatment of sexually transmitted infections (STIs), are integral components of this right. | **Source:** A/RES/78/4 para 74 |
UHC2030 statement on the zero draft of the Pact for the Future

- Thank you for convening these consultations.
- UHC2030 welcomes the zero draft.
- We share the vision of a world where no one is left behind and commend the language on vulnerable populations, gender equality, and eliminating violence against women and girls.
- We continue to call for health and UHC to be at the front and centre of the Summit.
- The impacts of COVID-19 were felt around the world – tragically costing millions of lives, taking a toll on economies, and reversing sustainable development progress.
- We must apply the lessons of the pandemic to build back better.
- We remain concerned that the zero draft does not adequately recognise the critical impact of health on economies and societies, including future generations.
- It must highlight that global emergencies need multilateral solutions, and our international system must be ready to address global health challenges.
- UHC and health security are intertwined goals achieved through the same health system.
- Countries with strong and resilient health systems for UHC are better prepared to prevent and respond to health threats – including pandemics, humanitarian crises, and climate change.
- The draft must acknowledge that achieving UHC is critical for our collective response to these threats.
- It must also recognise the adverse impacts of climate change on health and the need to build climate-resilient health systems.
- We live in a world where over half of the population lacks access to essential health services, and 2 billion people face financial hardship in accessing them.
- The draft must highlight that UHC is central to achieving health equity and leaving no one behind.
- If we fail to prioritise health, we fail to safeguard the future. The Pact for the Future is our chance to strengthen our cooperation for years to come - let's get it right.
- Thank you.
Opportunities to engage on Summit of the Future

The Summit of the Future website lines out different engagement opportunities, including stakeholder consultations and the UN Civil Society Conference (9 – 11 May).

In addition to this, your organization could engage by:

- Encouraging Member States to host broad and inclusive consultation processes as they negotiate the outcome documents.
- Encouraging internal consultation with various agencies and branches of government and advocating for the participation of relevant stakeholders, including communities, civil society and non-governmental organizations.
- Encouraging internal consultation across UN agencies and advocating for aligned and sustained engagement in the Summit of the Future process.
- Meeting with Permanent Missions in New York City and sharing UHC2030 aligned recommendations and submissions.
- Meeting with Government Departments (including Health Ministries and Foreign Affairs Ministries) and sharing proposed recommendations and submissions.
- Encouraging Parliament and MPs of relevant Committees to be fully aware of the Summit of the Future negotiation process and sharing recommendations with them – especially those requiring parliamentary action.
- Contacting relevant Ministerial Offices to raise Summit of the Future engagement and recommendations for the inclusion of UHC and health to be a key political priority.
- Forming thematic/other coalitions for submissions and coordinating with organizations working on similar thematics and subject matters.
- Encouraging civil society actors to make submissions and, where necessary, providing these with training and capacity building and encouraging aligned partnerships.
- Providing relevant information to the media on the Summit of the Future process and health-related recommendations.
- Holding public awareness campaigns on the Summit of the Future and UHC.
- Holding side events on the Summit of the Future.

Background on the Summit of the Future

The Summit of the Future will take place on 22 – 23 September 2024. It aims to forge a new international consensus on how to deliver a better present and safeguard the future by accelerating efforts to meet existing international commitments and taking concrete steps to respond to emerging challenges and opportunities. The Summit of the Future is co-facilitated by Germany and Namibia.

Its outcome document, the Pact for the Future, will be negotiated throughout the next months. It will consist of a chapeau and five chapters on (i) sustainable development and financing for development, (ii) international peace and security, (iii) science, technology and innovation and digital cooperation, (iv) youth and future generations, and (v) transforming global governance. The zero draft was published on January 26, 2024. An initial stakeholder consultation on the
Pact for the Future took place in December 2023, followed by a consultation on the zero draft in February. Further consultations may take place throughout the next months.

The Declaration on Future Generations will consider specific steps to account for the interests of future generations in national and global decision-making. It will be annexed to the Pact for the Future. Stakeholder consultations took place in January. You can find the timeline for the negotiation here.

The Global Digital Compact is expected to outline shared principles for an open, free and secure digital future for all and will be annexed to the Pact for the Future. Online consultations took place in 2022 and 2023, additional informal consultations are planned for February. You can find the timeline for the negotiation here.
