GLOBAL HEALTH COUNCIL
ANNUAL REPORT
2016
We are a formidable community addressing some of the world's most critical problems. Global Health Council is fortunate to have you as engaged members and partners that understand the importance of building consensus across our various priorities. Now, more than ever, we must use our collective voice to speak truth to power on behalf of those we serve worldwide. I am proud of what we have accomplished thus far and look forward to achieving more together next year. Here's to the future of global health!

~Loyce Pace, MPH, President & Executive Director, Global Health Council
ABOUT US

Established in 1972, Global Health Council (GHC) is the leading membership organization supporting and connecting advocates, implementers and stakeholders around global health priorities worldwide. The organization is the collaborative voice of the global health community on global health issues. GHC convenes stakeholders around key global health priorities and actively engages key decision makers to influence health policy.

MISSION

To improve health globally through increased investment, robust policies, and the power of the collective voice.

VISION

We envision a world where health for all is ensured through equitable, inclusive, and sustainable investment, policies, and services.
“Having an organization like GHC is extremely important. In addition to being good facilitators and conveners, the GHC serves as a neutral body and focuses broadly—not just on a single [public health] issue. It’s a ‘catch-all’ organization for advancing the global health agenda.”

-Public Sector Partner
The Power of GHC’s Collective Voice

GHC’s organizational members create a robust platform for global health advocacy.

POLICY & ADVOCACY
Engages with the global health community around today’s most important global health priorities

MEMBER ENGAGEMENT
Facilitates members' access to key stakeholders shaping today's global health agenda

CONNECTIONS & COORDINATION
Forges relationships between members as well as among members and the broader global health community
Over the past year, GHC worked through each of these pillars to engage our membership and the broader global health community on topical and cross-sector health issues. Moreover, we leveraged strategic linkages among members and between members and key stakeholders to align advocacy and programmatic efforts, and ultimately create real impact.
In the U.S. & Around The World

7000 + NEWSLETTER SUBSCRIBERS
Our weekly campaigns featured more than 400 major global health highlights, advocacy updates, events, and member spotlight stories in 2016
In 2017, GHC plans to work across our membership to promote a new narrative for global health with the goal of:

- Crossing the finish line on existing priorities
- Facing new threats head-on
- Preparing for the unknown

We also need to clarify our message to stakeholders beyond health and outside of Washington or Geneva.
"GHC provides a broad coalition of advocacy groups that can be mobilized if needed, which is an advantage given the needs of this environment."
